FLEXIBLE EXPERIENCES THAT ADD
VALUE TO MODERN HOTELS

TURNING UNDERUTILISED SPACE INTO
GUEST ENGAGEMENT
WITHOUT PERMANENT CHANGE.

The Challenge.

THE CHALLENGE HOTELS FACE TODAY

Underutilised space and evolving expectations.

Many hotels have valuable spaces that remain underutilised for large parts of the day. At the same time, guest expectations continue to evolve, with experiences becoming an increasingly important part of the overall stay.

The limitations of permanent solutions.

Permanent installations are costly, slow to implement and difficult to adapt once guest needs or usage patterns change. New concepts must therefore be flexible, easy for staff to manage and simple to deploy, without adding operational complexity.

GUEST EXPECTATIONS HAVE CHANGED

Guests expect more.

Experiences are now part of the stay.

Guests increasingly value experiences alongside comfort and service. Stays are no longer defined only by rooms and amenities, but by how time is spent within the property. Shared, interactive activities play a growing role in how hotels are experienced and remembered, particularly for families, groups and younger travellers.

A broader range of guest profiles.

Today's hotels serve a wide mix of guest types, from leisure travellers and families to business guests seeking ways to unwind after work. Expectations vary, but flexibility and choice are consistently valued. Hotels that can offer engaging experiences without committing to permanent changes are better positioned to meet these evolving needs.

The Need.

WHAT HOTELS ACTUALLY NEED

Flexibility without permanent change.

Hotels need solutions that allow spaces to evolve without committing to permanent modifications. Concepts must be easy to introduce, adjust or remove as guest profiles, seasons and usage patterns change.

No permanent construction.

No dedicated staff.

One setup, multiple use cases.

Flexibility reduces risk and enables hotels to test new experiences before making long-term decisions, while keeping spaces adaptable across the day and throughout the year.

Concepts that fit hotel operations.

Any new experience must work within existing hotel operations. It should be simple for staff to manage, quick to deploy and easy to maintain without requiring specialised technical skills.

Designed for shared and public use.

Setup in minutes, not days.

Integrated into daily workflows.

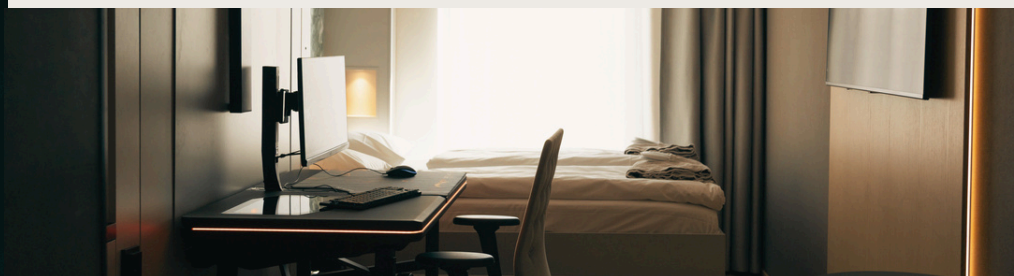

Solutions that fit naturally into hotel environments allow properties to enhance guest experiences without adding operational complexity.

ONE PLATFORM.
MANY POSSIBILITIES.

The UNEVN approach.

UNEVN offers **a modular, plug-and-play experience platform, centred around the UNEVN BASE**, enabling hotels to introduce engaging digital and social experiences in shared spaces without permanent change or added operational complexity.

PAGE 04

Flexibility without permanent change.

UNEVN is designed to help hotels activate spaces without permanent change. The platform combines modular furniture, integrated technology and a plug-and-play setup that allows experiences to be introduced, adjusted or removed as needs evolve.

Rather than locking hotels into a single use case, UNEVN enables the same setup to support different guest profiles, seasons and activations over time.

Concepts that fit hotel operations.

UNEVN is built specifically for shared spaces and public use. The system is robust, easy to manage and quick to deploy, allowing staff to operate it confidently without specialised technical skills.

By fitting naturally into existing hotel environments and workflows, UNEVN helps hotels enhance guest experiences while maintaining operational simplicity.

USE CASES IN PRACTICE.

ADAPTABLE EXPERIENCES
ACROSS HOTEL CATEGORIES

Extended Stay & Hybrid Concepts

One setup.
Multiple daily use cases.

Business & City
Hotels

Evening engagement
without operational
overhead.

Leisure &
Lifestyle Hotels

Shared experiences
that extend time on
property.

Resorts & Family
Destinations

Flexible entertainment
for different guest
profiles.

READY TO DEPLOY

Simple to deploy. Easy to manage.

Fits existing hotel operations.

UNEVN is designed to integrate seamlessly into existing hotel environments and workflows.

The platform is quick to deploy, simple for staff to manage and requires no permanent modifications or specialised technical expertise.

- No permanent changes to rooms or public spaces
- Minimal staff training required
- Flexible activation and removal as needs evolve
- Suitable for pilot projects and phased rollouts

Delivered with trusted partners.

UNEVN works with established hospitality and technology partners to support planning, deployment and ongoing operations and to ensure a smooth introduction tailored to each property.
